

Environment Policy Statement

Promethean World Limited is a global education company that provides solutions which include hardware and software, to enrich, enlighten and inspire the learning experience of current and future generations around the world.

As part of our commitment to continual environmental improvement, we continuously strive within our business to prevent pollution that can have a detrimental impact on the environment and to comply with all applicable environmental, legal and other requirements.

As such, we have established an environmental management standard which includes a framework for setting and reviewing objectives, targets and improvement programmes. Where feasible we will:

- Minimise consumption of non-renewable energy sources across all activities to ensure we meet continually improving energy performance standards;
- Minimise the wastes we generate and the consequential environmental impacts by seeking opportunities to reduce, reuse and recycle;
- Through the use of technological solutions, seek ways to reduce the environmental impact of the transport of our products wherever practicable; and
- Work to ensure that the products, services, and materials which Promethean sources and purchases are as sustainable as practical.

Through ongoing communication, training and education, our employees understand the environmental issues related to their activities and are expected to undertake such activities in line with the goals of this Environmental Policy Statement.
